RUNNING PROCESS OF APPLICATION

1: Run the application

In the command prompt, navigate to the folder in which the flask app is present. When the python file is executed the local host is activated on 5000 port and can be accessed through it.

```
C:\Windows\System32\cmd.exe-python -m flask run

(venv) C:\Users\ELCOT\Downloads\pythonProject10\pythonProject10\python -m flask run

* Environment: production

* Environment: production

MANUTING: This is a development server. Do not use it in a production deployment.
Use a production WSGI server instead.

* Debug mode: off

MANUTING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.

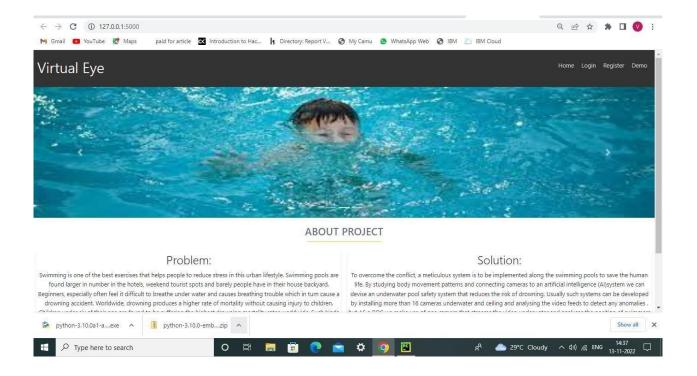

* Running on http://127.0.0.1.s5000
